TORTATO
ARCHITETTI

 GIUSEPPE **TORTATO** ARCHITETTI

YEARS 2026

FILOSOFIA

*Architecture e interior design con un **approccio “sartoriale” la natura** negli spazi progettati, come **elemento attivo di rigenerazione urbana e sociale**, gli **elementi naturali**, la luce in particolare, divengono essi stessi “materiali da costruzione”.*

PHILOSOPHY

*Architecture and interior design with a “**tailored” approach to nature** in the spaces designed, used **as an active element of urban and social regeneration**, natural elements, light in particular, which in and of themselves become “building materials”.*

UN APPROCCIO SARTORIALE

Lo studio propone un profilo multidisciplinare occupandosi di **architecture e interior design** con un **approccio** ugualmente “su misura” per una committenza italiana e internazionale, sia corporate che privata.

A TAILORED APPROACH

*The studio offers a multidisciplinary profile dealing with **architecture and interior design**. We offer an approach that is “custom tailored” for Italian and international clients, both corporate and individual.*

L'UOMO AL CENTRO DEL PROGETTO

Lo Studio svolge un’attività di ricerca su tematiche legate all’**esperienza sensoriale** ed alla sostenibilità, ponendo l’uomo e la natura come elementi cardine attorno ai quali sviluppare nuove architetture. L’approccio progettuale è di tipo olistico e prevede l’integrazione degli elementi naturali all’interno degli spazi progettati con una funzione “catartica”

HUMAN-CENTERED DESIGN

*The studio actively researches topics **linked to sensory experience** and sustainability, considering human beings and nature as central elements around which to develop new architectures. This holistic approach to design and planning envisions the integration of natural elements within the spaces designed to serve a “cathartic” function.*

LA RIGENERAZIONE URBANA

In chiave urbana e paesaggista la progettazione si confronta necessariamente con il contesto in cui si sviluppa partendo da un’analisi critica che vede nell’architecture una possibilità di **rigenerazione urbana e sociale**.

URBAN REGENERATION

*When considering urban and landscape design, we are necessarily confronted with the context in which it develops, starting from a critical analysis that sees architecture as a possibility for **urban and social regeneration**.*

GLI OBIETTIVI

L’obiettivo ai diversi livelli progettuali è rivolgersi e al tempo stesso generare un uomo consapevole, libero dagli stereotipi di mercato e dalle mode passeggiere, creando spazi a misura d’uomo che ne liberino le energie attraverso i sensi e gli **elementi naturali, la luce in particolare**, che divengono essi stessi “materiali da costruzione”.

OBJECTIVES

*At different levels of design, our objective is to address and at the same time generate an aware person, free from market stereotypes and passing fashions, by creating spaces on a human scale that release their energies through the senses and through **natural elements, light in particular**, which in and of themselves become “building materials”.*

COSA FACCIAMO

*Giuseppe Tortato Architetti è guidata da **professionisti che integrano competenze diverse**, coniugando un approccio imprenditoriale ad una visione anche sociale dell'architecture, che si esprimono nell'attenzione al client ed alle sue esigenze.*

WHAT WE DO

*Giuseppe Tortato Architetti is led by **professionals who integrate different skills**, combining an entrepreneurial approach with a vision of architecture that is also socially aware, expressed through attention to our clients and their needs.*

PROGETTAZIONE INTEGRATA

Lo studio propone, tramite un consolidato team di specialisti, **l'integrazione e l'interazione fra le diverse competenze** quale condizione fondamentale per assicurare al client un progetto sostenibile e di successo. Il processo di progettazione integrata, anche grazie all'adozione generalizzata del Building Innovation Modeling (BIM), garantisce un **costante controllo di costi, tempi e qualità** in fase di cantiere fino alla gestione degli immobili realizzati, mentre il coordinamento delle diverse discipline consente una gestione ottimale delle fasi operative, uno strumento digitale che prevede l'adozione di modelli intelligenti in grado di fornire le informazioni necessarie per creare e gestire progetti in modo efficiente.

INTEGRATED DESIGN

*The studio offers, through an established team of specialists, **integration and interaction between their various competences**, which is a fundamental condition for ensuring a sustainable and successful project for our clients. The integrated design process, due to the widespread adoption of Building Innovation Modeling (BIM), guarantees the **constant monitoring and control of costs, time, and quality** throughout the construction process, up to and including the management phase of the completed properties. Meanwhile, the coordination of the different disciplines allows for the optimum management of the operational phases. This digital tool provides for the use of intelligent models able to supply the information necessary for efficiently creating and managing projects.*

SERVIZI DI CONSULENZA

Grazie all'esperienza maturata nel corso degli anni, lo studio è in grado di **supportare i committenti, sia istituzionali che privati**, nelle fasi del processo decisionale strategico tipici del settore immobiliare realizzando due diligence urbanistiche, **facendo emergere punti di forza, criticità e rischi connessi**. Nella fase progettuale lo studio è strutturato per offrire un **servizio di project management** per la gestione e il coordinamento multidisciplinare del processo edilizio con un costante controllo di costi e qualità, **garantendo a pieno le esigenze e le aspettative del Committente**.

ADVISORY SERVICES

*Thanks to the experience gained over the years, the studio is able to support both our institutional and individual clients in the strategic decision making stages that are typical of the real estate sector, performing **due diligence** in terms of **zoning, highlighting strengths, critical issues, and assessing the risks involved**.*

*During the design phase the studio is structured to provide **project management** services for the multidisciplinary management and coordination of the building process, which incorporates constant cost and quality control, **ensuring that all of the client's needs and expectations will be met**.*

RETAIL, OFFICE ED INTERIOR DESIGN

Comunicazione dei valori aziendali, attenzione e benessere degli utenti, piuttosto che “oasi di pace domestica” trovano la migliore sintesi nell’**approccio sartoriale dello studio da oltre vent’anni attivo anche nel settore “Interior”**.

Un **approccio multidisciplinare** alla progettazione, che integra gli aspetti tecnici ed ingegneristici del confort ambientale con l’**attenzione alla persona, alla comunicazione o alla corporate identity**, con la possibilità di gestire integralmente il ciclo progettuale di headquarters piuttosto che di residenze private dalle fondazioni al fit out degli Interior.

RETAIL, OFFICE, AND INTERIOR DESIGN

Communicating company values, attention to and wellbeing of users, rather than “oases of domestic peace” discover the best possible synthesis in the tailored approach of our studio, which has been active in the interiors sector for over twenty years. A **multidisciplinary approach** to design, which integrates engineering and technical aspects of environmental comfort, **focusing attention on the individual, communication, or corporate identity**, with the ability to fully manage the design and planning cycle for corporate headquarters—as well as for private residences—from the foundations to interior fit outs.

PROGETTAZIONE BIM

La **tecnologia BIM** è adottata e sviluppata dallo studio, consentendo di condividere con i committenti e il team di lavoro un **sistema integrato di controllo, sviluppo e coordinamento del progetto**.

Lo studio fornisce servizi di consulenza nella **stesura delle linee guida bim** e capitolati personalizzati alle esigenze dei Clienti operanti nel settore dello sviluppo immobiliare, sia per la fase di progetto che per la successiva fase di gestione dell’Building.

BIM DESIGN

BIM technology has been adopted and developed by the studio, making it possible to share the **project’s integrated control, development, and coordination system** with the client and the working team.

The studio provides advisory services in **drafting bim guidelines** and specifications customized to meet the needs of clients operating in the real estate development sector, both for the design and planning phase as well as for the building management phase.

BIO

(...) architetture che nascono dalla cultura e dalla storia dei luoghi sposando tecnologia ed ambiente naturale, con una forte integrazione tra elementi architettonici e paesaggistici (...)

Nato a Venezia nel 1967, Giuseppe Tortato consegue la laurea presso il Politecnico di Milano per poi trasferirsi ad Amherst nel Massachusetts dove collabora con un allievo di Paolo Soleri alla realizzazione di edifici pubblici e privati secondo i principi dell'architecture bioclimatica. Rientrato a Milano, dopo un paio d'anni di collaborazione con Dante Benini, si associa allo studio Milano Layout fino a diventarne co-titolare. Nei primi dieci anni del duemila è stato l'ideatore dei principali progetti dello studio nell'ambito Real Estate, si dedica alla progettazione di New complessi edilizi e della rigenerazione urbana. Nel 2012 fonda Polisfluxa Srl e Giuseppe Tortato Architetti, "New contenitori" con cui proseguire la propria attività professionale, dedicandosi con un approccio multidisciplinare e ugualmente "sartoriale" a progetti di architecture ed interior design, per una committenza italiana e straniera sia corporate che privata. L'approccio alla progettazione nasce dalla ricerca sui temi dell'esperienza sensoriale e della sostenibilità, ponendo l'uomo e la natura come elementi centrali attorno ai quali sviluppare la propria architecture, portando gli elementi naturali all'interno degli spazi progettati. Ha Realized per Beni Stabili il concept del Green Business Hotel di Milano e per GVA Redilco il progetto dell'Hotel Metropole di Paris, rispettivamente finalista e Winner dell'Hospitality Award 2009 e 2010. Ha collaborato come docente di progettazione alberghiera con il Polidesign di Milano e La Sapienza di Roma. Con la realizzazione del progetto La Forgiatura a Milano si è imposto all'attenzione nazionale e internazionale. È stato l'unico italiano selezionato tra 40 candidati all'Energy Performance + Architecture Award 2013. Con progetti di architecture e di retail è stato finalista in varie categorie di progettazione per The Plan Award 2015, 2016 e 2020, mentre nel 2019 The Plan gli conferisce la Honorable mention per il progetto Arcadia Center Milano. Nel 2017 AB Medica Headquarters è stata selezionata per il Premio Internazionale Dedalo Minosse. Attualmente con il supporto di un team multidisciplinare di professionisti, l'attività di progettazione è sviluppata a livello nazionale ed internazionale nei settori Residential, terziario, fashion e food retail.

(...) Architectures that arise from the culture and history of the sites marrying technology and the natural environment, with strong integration between architecture and landscape (...)

Born in Venice in 1967, Giuseppe Tortato graduated from Polytechnic in Milan before moving to Amherst, Massachusetts, a small university town in the maple forests of New England, a few hours by car from Boston and New York. There, he collaborated with a pupil of Paolo Soleri in the creation of public and private buildings in accordance with the principles of bioclimatic architecture. On returning to Milan, after a couple of years of collaboration with Dante Benini, he intertwined his work experience with those of Milano Layout, first becoming a member and then co-owner, creating inside the company his own structure in the field of Real Estate dedicated to the design of new complex buildings and urban regeneration, In 2012 he founded Giuseppe Tortato Architetti and Polisfluxa Ltd with which to carry out his activities. For over ten years Giuseppe has been the creator of many architectures at Milano Layout Ltd. The underlying theme of his design approach is to combine experimental dimension and environmental sensitivity / sustainability with concrete professionalism: spaces of high comfort contained by elegant architecture. He cooperated as a teacher of hotel design with the Polidesign of Milano and La Sapienza of Rome. The realization of "La Forgiatura" project in Milano has won national and international attention. He was the only Italian selected among 40 people at the Energy Performance + Architecture Award 2013. With architecture and retail projects Tortato was a finalist in various design categories for The Plan Award 2015, 2016 and 2020, while in 2019 he received the The Plan honorable mention for the project Arcadia Center in Milano. In 2017 AB Medica headquarters was selected for the International Dedalo Minosse Prize. Currently, supported by a multidisciplinary team of professionals, Giuseppe Tortato carries out research and design activities at international level in the tertiary, residential, retail and interior design sectors.

COSA DICONO DI NOI

“(...) La sua architecture appartiene sicuramente a questo nostro terzo millennio, dove in ogni progetto gli attori, i linguaggi e le ibridazioni sono molteplici e per ottenere un risultato significativo il progettista deve sapere essere soprattutto un abile regista per riuscire a mantenere una individualità originale di pensiero e di proposta. Il grande talento di Tortato è proprio nell’armonizzare la sua prorompente creatività con le possibilità realizzative che l’industria offre e con i desideri, molte volte inespressi, dei suoi clienti. (...)”

Cesare Maria Casati / Direttore Arca International

WHAT PEOPLE ARE SAYING ABOUT US

“(...) His architecture certainly belongs to the this, our third millennium, where in every project there are multiple actors, languages, and hybridizations. To obtain a meaningful result in this era, above all the designer must know how to be an accomplished director in order to maintain an original individuality in terms of both ideas and proposals. Tortato’s great talent is that of harmonizing his unbridled creativity with the concrete possibilities offered by the industry as well as with the, often unspoken, desires of his clients. (...)”

Cesare Maria Casati / Director Arca International
